SUMMARY

Self-driven Full-Stack & Mobile Developer with a degree in Smart Device Computing and hands-on experience delivering paid freelance projects. Builds web applications, desktop tools, and mobile apps used daily in real-world environments. Solves problems independently, learns fast, and ships working software.

TECHNICAL SKILLS

Languages	JavaScript , Python, C# / .NET, Kotlin, Dart
Frameworks	Flutter, Django, Flask, ASP.NET
Databases	MySQL, SQLite
Tools	Git, GitHub, Docker, REST APIs, Linux / CLI
Platforms	Web, Desktop (Windows), Mobile (Android / iOS), Browser extensions

PROJECTS & EXPERIENCE

School finance management system Freelance — paid

Web app + browser wrapper | JavaScript, REST API

Finance management tool for Jordanian schools, used by headmasters to track budgets, inventory, and generate reports. Deployed as both a web app and a packaged browser wrapper for offline use.

Government data automation tool Freelance — paid

Desktop app + browser extension | C# / .NET

Windows desktop app with a companion browser extension that scrapes data from a government portal and auto-generates official teacher documents and headmaster statistics reports.

Service & product showcase website Live — <https://www.futureisnow.site/>

Web platform with 3 sub-applications

Built and maintains a live website featuring product/service display with 3 browser-based sub-applications hosted as subdomains.
